Vinyl Replacement Window System from Lockheed

Enduring Tradition

Monarch™

The very name is synonymous with nature, kings and beauty.

When designing our vinyl replacement window system, our engineers looked to nature for inspiration. The result was Monarch™, a vinyl window series by Lockheed Window Corp.

As a third generation, family-owned business, our employees take personal pride in every window that comes out of our manufacturing facility. It is also why our products have been ENERGYSTAR® Certified, providing homeowners with the assurance of quality and performance.

Our plant and offices feature a state of the art facility that includes the most technologically advanced machinery, ensuring a quality finished product every time.

Each Monarch™ window is individually custom made and inspected by our professionally trained quality control team. That's why the Monarch™ Window System is backed by one of the strongest warranties in the industry.

"As a local, family-owned business, you can be assured that our products exceed the requirements of our customers. Our commitment to our contractors and dealers will not be surpassed."

Built for a Lifetime

The Monarch™ vinyl window line was designed specifically to exceed the demands of the various Northeast weather conditions. In independent laboratory testing the Monarch™ Vinyl Window System met or exceeded most local building code requirements for the Northeast. Our engineers have combined the finest in window technology, to bring you a structural system that will provide optimum performance, and fine site lines that will deliver enduring beauty.

Constructed for Performance

Our .072" multi-chambered, solid vinyl walls are the core strength behind the Monarch™ product. Assembled utilizing our high-tech fusion-welding system, the Monarch™ window is virtually impenetrable by wind and water. Despite the superior strength, we have not sacrificed appealing site lines that allow maximum glass viewing area.

High Performance Glazing System (Optional)

Our high performance glazing system combines PPG Solarban® 60 LowE glass that is manufactured by the most recognized glass manufacturer in the country, PPG Industries. When this unique glass is combined with our dynamic TGI Wave warm edge spacer technology (standard) and argon gas filled insulating glass, your home will achieve maximum energy savings.

Design Flexibility

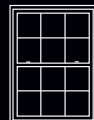

In addition to our Monarch™ double hung window, we manufacture a compatible series of vinyl windows to meet virtually any design dream you may have. Our manufacturing facility can produce windows in a variety of styles, shapes and sizes to replace those old drafty windows in your home.

Custom Made

Each Monarch™ window that comes out of our manufacturing facility is custom-made to the requirements of your contractor, special for your home. Every window is precision-made, so that each window you replace is retrofitted with a perfect match. This ensures enduring performance and energy-savings for the life of the product.

Inspired by Nature

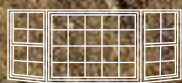

Natural Advantages

The Monarch™ Window System is compatible with Lockheed's full line of windows.
