CAPABILITIES STATEMENT

Our commitment to our customers is to provide the most competitive price for a quality product in an acceptable defined time frame with outstanding customer service.

Since 1955, Lockheed Window Corp. has been manufacturing exceptional quality products to meet the needs of our customers. The company serves residential and commercial window and door customers from two company divisions. It is our goal to develop and maintain mutually beneficial, long-term customer relationships by being continually responsive to the needs of the marketplace and our customers.

Our Commercial Sales Division is a major competitor in the aluminum window, curtainwall, storefront and door fabrication market and continues to expand beyond the New England area. We employ our own experienced installation crews, engineers, project managers and most work is bonded. We manufacture our own commercial window systems and have established business partnerships with other nationally recognized manufacturers.

We are proud to be a partner of ENERGY STAR® and a member of the Efficient Window Collaborative. We are also active members of the National Fenestration Rating Council (NFRC), National Association of Home Builders (NAHB), National Window and Door Association (NWDA), National Association of the Remodeling Industry (NARI), and the Associated Subcontractors of Massachusetts (ASM). 2/20/09

Products: Lockheed Window Corp. manufactures mechanical and fully welded vinyl residential window and door systems and secondary aluminum combination window and door products in various styles and colors. Lockheed residential window and door products can be purchased from building supply and lumber dealers and glazing contractors throughout New England and Eastern New York State.
